ProSpec Upright

Designed for professionals

ProSpec™

Designed for professionals

The ProSpec series perfectly complements a high-performance culinary kitchen. For professionals that need the best of the best, ProSpec utilises SKOPE's powerful ActiveCore technology and incorporates a minimalist, design-led aesthetic. With the highest specification built-in, ProSpec eliminates compromise.

The ultimate gastronorm solution

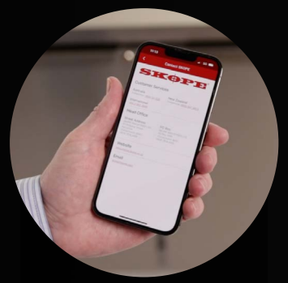

ProSpec is high-performance stainless steel gastronorm refrigeration designed for heavy duty food storage requirements. All ProSpec models feature a full 304 stainless steel build, internally and externally. This includes our GN 2/1 shelves, ensuring optimal interchangeability throughout the kitchen. Stainless steel one-piece runners can quickly be adjusted for flexible shelf spacing. With coved internal corners and completely removable stainless steel shelving system, the entire interior of the cabinet can be easily deep cleaned.

The SKOPE Difference | Nothing performs like a SKOPE

Unrivalled Energy Efficiency

Low energy R290 natural refrigerant delivers cutting-edge energy efficiency resulting in significant annual energy cost savings and environmental benefits.

Unprecedented Control

The SKOPE-connect app monitors and controls temperature and energy consumption to maximise fridge performance and provide downloadable data of actual temperature history.

Precise Temperature Performance

ProSpec consistently holds temperature, certified to work in ambient temperatures of up to 40°C, making it perfect for even the hottest environments. For busy kitchens, ProSpec stays food safe even with high-frequency door openings.

Quiet Running

ActiveCore technology is synonymous with quiet operation and the latest series of ProSpec storage fridges and freezers are our quietest yet.

Quicker, Safer Servicing

Servicing takes next to no time with the ActiveCore interchangeable refrigeration cartridge. The cartridge can be swapped out on the spot so repairs can be made safely offsite, thereby avoiding costly kitchen closures.

Ergonomic Door Design

The whole ProSpec upright series features a full height stainless steel door handle for ease of opening and cleaning.

Typical SKOPE Toughness

Strong 304 stainless steel interior and exterior and the specification of quality components delivers SKOPE reliability and toughness for a longer life.

Superior Warranty Protection

SKOPE has always been synonymous with quality, that's why our ProSpec fridges are backed by a market-leading full 5 year warranty and our ProSpec freezers by a full 3 year warranty.

ProSpec Upright Fridge | Summary

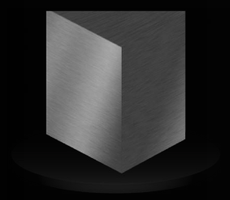

Top Mount

Perfect for:

- Busy kitchens that require the ultimate in refrigeration performance
- Working environments where operational efficiency is critical
- Open kitchens that require the sharpest of finishes
- When you want the security of a market-leading warranty

Available Configurations

- Doors – 1, 2
- Door Finish – solid
- Exterior & Interior Finish – 304 stainless steel
- Refrigeration Unit – self-contained R290
- Refrigeration Unit Placement – top

A Minimalist Outlook

Unprecedented Control

Quicker, Safer Servicing

Key Features

- ActiveCore removeable refrigeration cartridge
- GEMS approved for food storage in ambient temperatures of 40°C
- Efficient and green engineering using R290 natural refrigerant
- 5 x stainless steel GN 2/1 shelves per door
- Stainless steel repositionable shelf runners and fully removeable brackets
- Door activated LED lighting
- Built-in key locks
- SKOPE-connect app
- Removable 100mm castors
- 5 year warranty

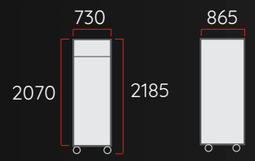

Options

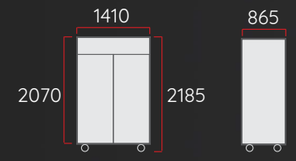

- Extra GN 2/1 stainless steel wire shelves and slides
- Extra runners
- Additional GN 2/1 stainless steel wire shelf
- Retrofit hinge kit

Stock Availability

- Stocked – all models

ReFlex Upright

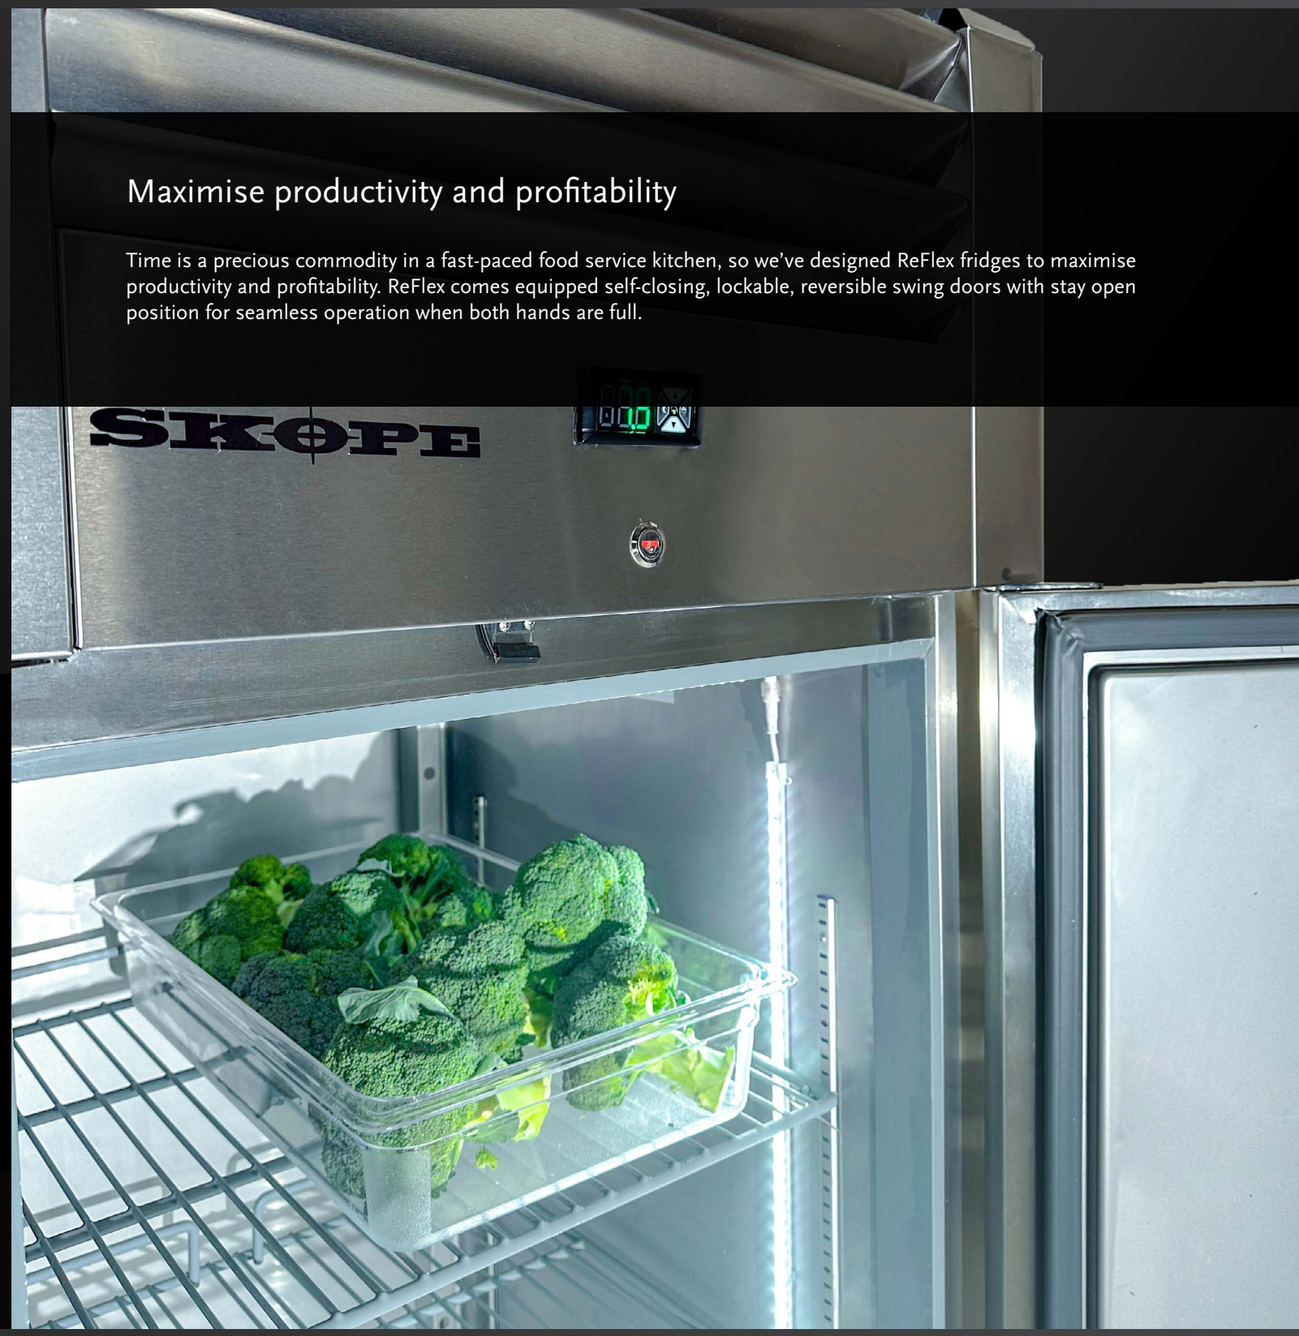

Dependable quality, exceptional value

ReFlex™

Unbeatable value on a smaller footprint

SKOPE engineered our award-winning ReFlex series to include everything most food businesses require in one value-packed product range. Our ReFlex upright refrigeration is designed for food service businesses looking to maximise every dollar. With our market-leading SKOPE-connect technology, ReFlex delivers ultra-precise temperature control, streamlined compliance, and lower refrigeration costs direct from your smartphone. At the press of a button, you can adjust the temperature control, streamlined compliance, and lower refrigeration costs direct from your smartphone. On your smartphone, you can also adjust the temperature range to match food type, export data for HACCP compliance, and analyse historical data to minimise power costs over time.

Maximise productivity and profitability

Time is a precious commodity in a fast-paced food service kitchen, so we've designed ReFlex fridges to maximise productivity and profitability. ReFlex comes equipped self-closing, lockable, reversible swing doors with stay open position for seamless operation when both hands are full.

The SKOPE Difference | Nothing performs like a SKOPE

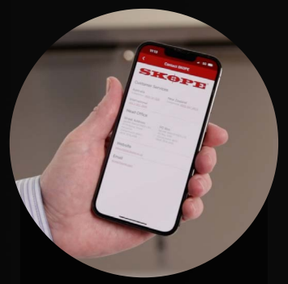

Award Winning Technology

ReFlex was named the Foodservice Consultants Society International (FCSI) Best New Hospitality Equipment Product at Fine Food Australia due to its innovation and value.

Small Footprint

ReFlex upright storage fridges and freezers delivers food safety on a small footprint. Where space is at a premium choose one of the 5 ReFlex upright models.

Maximise Every Dollar

SKOPE-connect is the app that monitors and controls temperature, lighting, and energy consumption from your smartphone to maximise fridge performance and increase the profitability of your business.

Typical SKOPE Toughness

Strong 304 stainless steel interior and exterior with the specification of quality components delivers SKOPE reliability and toughness.

Precise Temperature Performance

ReFlex fridges and freezers consistently hold temperature, certified to work in ambient temperatures of up to 40°C, making it perfect for even the hottest of kitchens.

Superior Warranty Protection

SKOPE has always been synonymous with quality. That's why our ReFlex underbench fridges and freezers are backed by a market-leading full 3 year warranty.

ActiveCore™

The industry benchmark

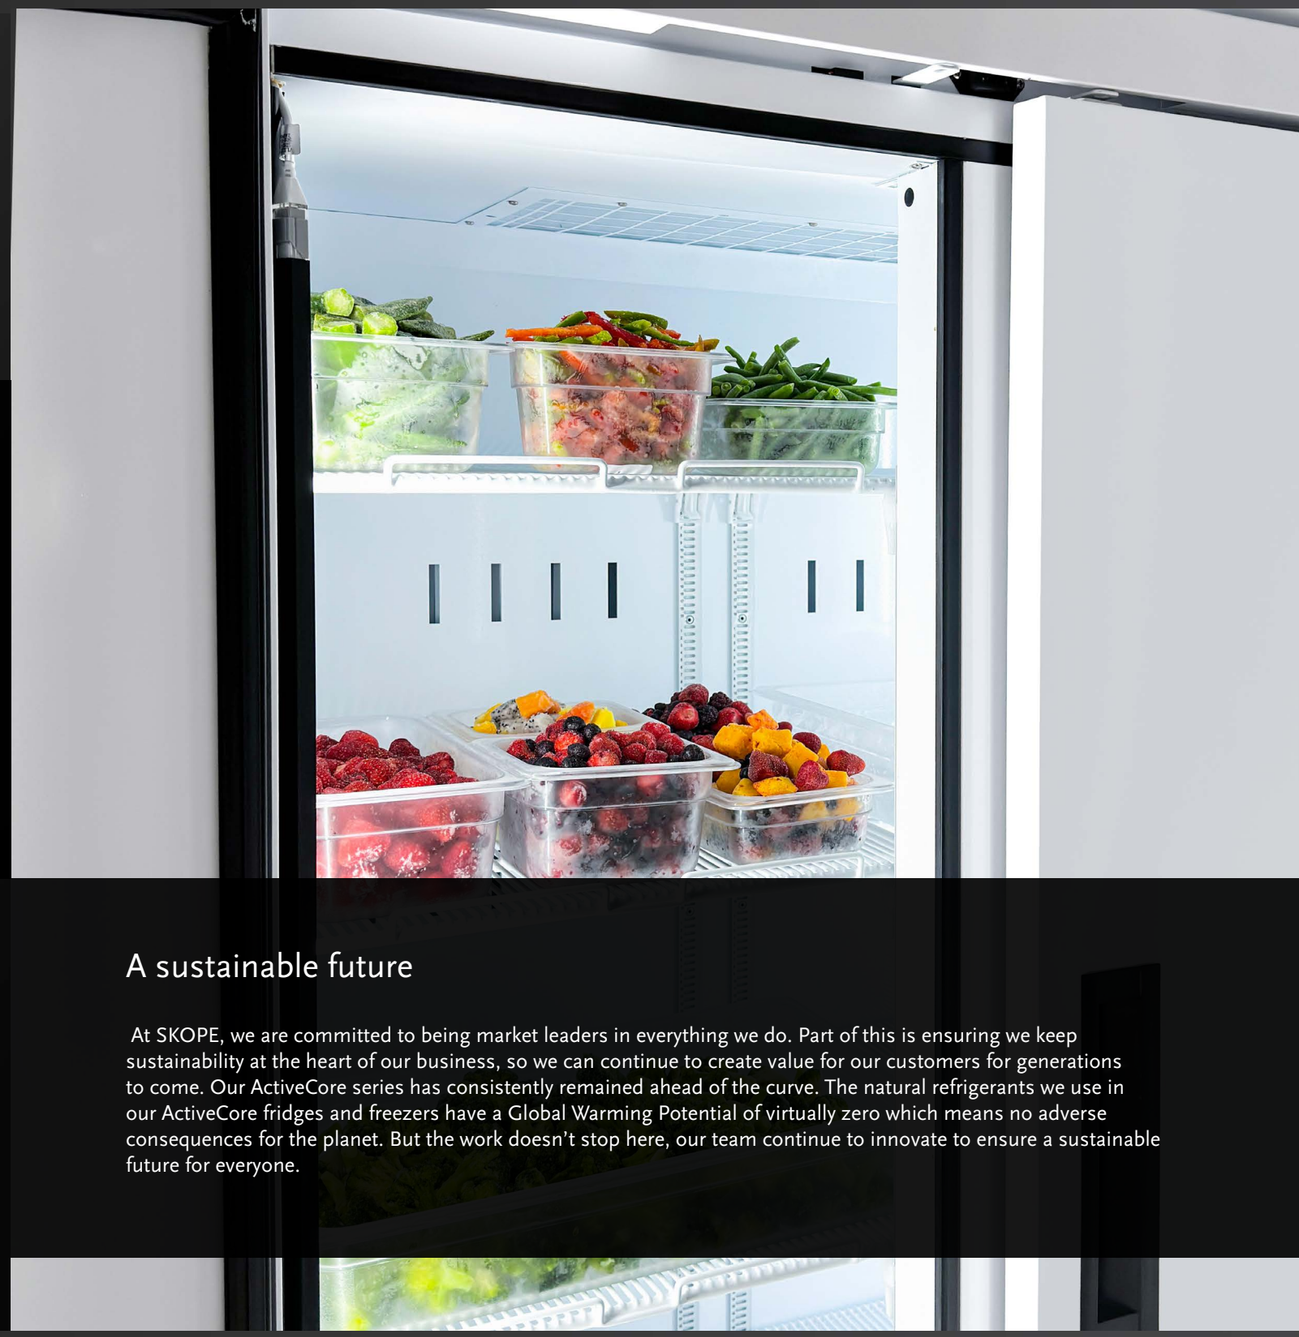

ActiveCore Solid Doors

High efficiency performance

ActiveCore technology achieves high performance and low power costs like no other. At the heart of any ActiveCore is its interchangeable cartridge, which isn't just notable for the streamlined maintenance it offers, but the way it leverages R290 hydrocarbon natural refrigerant and cutting-edge technology to achieve both extreme temperature consistency and market-leading power economy. ActiveCore fridges and freezers consistently hold temperature, even on 40°C days and with continual door openings in busy venues.

A sustainable future

At SKOPE, we are committed to being market leaders in everything we do. Part of this is ensuring we keep sustainability at the heart of our business, so we can continue to create value for our customers for generations to come. Our ActiveCore series has consistently remained ahead of the curve. The natural refrigerants we use in our ActiveCore fridges and freezers have a Global Warming Potential of virtually zero which means no adverse consequences for the planet. But the work doesn't stop here, our team continue to innovate to ensure a sustainable future for everyone.

The SKOPE Difference | Nothing performs like a SKOPE

Unrivalled Energy Efficiency

ActiveCore low energy R290 refrigerant saves over $1,250 per year[1] on running costs compared to some competitors, resulting in significant environmental benefits.

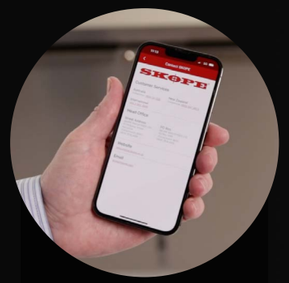

Truly Green Technology

The Global Warming Potential of our natural refrigerant is virtually zero. Other refrigerants can be over 54,000 times worse for the environment.

Precise Temperature Performance

ActiveCore fridges and freezers consistently hold temperature, even in ambient temperatures of up to 40°C, making it perfect for even the hottest environments.

Unprecedented Control

The SKOPE-connect app monitors and controls temperature and energy consumption to maximise fridge performance and provide downloadable data of actual temperature history.

Quicker, Safer Servicing

Servicing is super quick with the ActiveCore interchangeable refrigeration catridge. The cartridge can be swapped out on the spot so repairs can be made safely onsite and not result in costly kitchen closures.

Quiet Running

ActiveCore is a name synonymous with quiet front of house experiences and the latest series are our quietest yet. Lower noise even further with built-in hush mode.

Typical SKOPE Toughness

Options of powder-coated galvanised steel or full stainless steel construction along with the specification of quality components delivers SKOPE reliability and toughness for the optimum lifespan.

Superior Warranty Protection

SKOPE has always been synonymous with quality. That's why ActiveCore is backed by a marketing-leading full 5 year warranty.

Holding Cabinets

Climate under control

Holding Cabinets

Next level sustainability

The CP Next holding cabinets are equipped with R290 natural refrigerant technology to provide faster performance and deliver the utmost efficiency with virtually zero impact on global warming. The global warming potential (GWP) is just 0.072, making it more than one thousand times lower than other refrigerant gases while achieving 40% more energy efficiency compared to older models.

Preservation

Designed with your culinary creations in mind, Irinox holding cabinets maintain constant temperatures and manage humidity levels depending on your requirements. By evenly and gently moving ventilation across all trays, food is ensured to not become dry while preserving nutritional properties, fragrance, colour and texture.

The smart airflow system ensures a stable temperature in all working conditions, even in situations of frequent and repeated door openings.

SKOPE & Irinox | Uniting for a premium experience

Room to Innovate

Designed for professionals, Irinox's holding cabinets offer competitive internal storage volumes to accomodate a range of tray sizes.

Ergonomic Handle

An ergonomic door handle shape and design ensures a durable, easy to clean and effortless to grip handle, designed to be opened and shut constantly throughout the day.

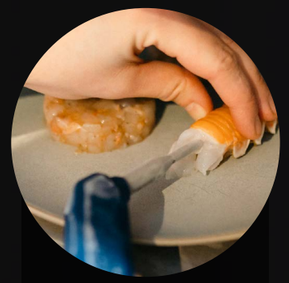

Unparalleled Accuracy

Thanks to an innovative air-flow distribution system, Irinox holding cabinets ensure an accurate and stable temperature, regardless of the working conditions and number of door openings.

Optional Sanigen Anti-Bacterial System

Sanigen (optional) acts on the microbes present in the air and on surfaces. It is proven to reduce contamination and bacterial load in the air by up to 99% and works for hard to reach areas such as the evaporator.

HACCP Compliance

Compliance is made easy with the holding cabinets temperature accuracy, and the ability to quickly download (or transfer to a USB) all the logged food safety data at any time.

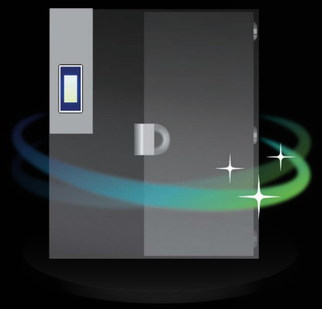

Superior Warranty Protection

Irinox blast chillers are backed with 2 years parts and labour warranty from Australasia's leading commercial refrigeration service business - SKOPE Services.

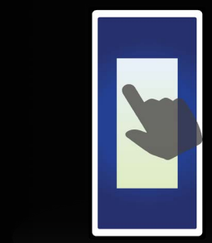

CP Next | Summary
