Thaya Hot

Thaya Heated Display

The Thaya cabinet range provides a modern and flexible solution to suit most businesses. It features European styling and a humidity controlled environment that keeps a level of moisture in the air, thereby slowing the deterioration of food on display. This means less waste and improved quality for your customers.

Thaya has a multi-tiered design which means you can store and display more food with minimal bench space. It may be integrated into your counter-top or positioned on the counter.

The Thaya heated cabinets are convection based with a large tray of water and the element above. The convection fans push air past the element and the water, creating the humidity. The fans then circulate the air evenly throughout the cabinet providing constant temperature.

Features:

- Multi-tier design displays more food with less counter space
- Drop-in or benchtop installation
- Quality stainless steel construction
- LED lighting
- Removable shelves for flexibility of display and easy cleaning
- Water tray for humidification of display keeps food fresher for longer
- Available in four sizes
- Available in matching refrigerated units for a complete line-up solution
- Adjustable feet
- Removable front panel allows unit to drop into bench top for seamless look

Model	Dimensions W x D X H (mm)	Power Supply Required	Power Input (W)	Lighting	Temperature	Weight
Thaya Hot GN1	476 x 718 x 587.5	240v, 10 Amp	1100	LED	+30/+90 C	53kg
